

## WHAT IS A GASTRIC BALLOON?

A gastric balloon, or belly balloon, partially fills your stomach leaving less room for food. The soft balloon is designed to be placed and removed through your mouth using an endoscope while you're under sedation. The balloon is inflated with saline solution, to create a feeling of early and prolonged fullness after meals.

The belly balloon is the cornerstone of our balloon program: a comprehensive package of education, nutritional guidance, positive support, and your best chance of weight loss success. Gastroenterology Specialists' Dr. Kane is one of the first doctors certified in the US to offer the belly balloons. We offer both the ReShape® and Orbera® balloons which have just been FDA approved for use in the US.

## WHY DO SO MANY SMART AND SUCCESSFUL PEOPLE FAIL AT DIETS?

Because diets are not built for success. Anyone can say "eat less and move more," but how many of those people actually understand weight loss? Welcome to what's next: our weight loss specialists offer a comprehensive balloon program that incorporates the latest medical innovations with a system of experts in nutrition and support.

*With Gastroenterology Specialists's Gastric Balloon Managed Weight Loss Program, you can expect to lose up to 85lbs\* of excess weight within six months providing you follow the program correctly.*

*\*Weight loss results vary from person to person.*

The FDA has approved a device called the intragastric balloon, or belly balloon, that can allow you to achieve substantial weight loss success without surgery.

This belly balloon is a tool that will drive your success as you follow our comprehensive program of diet, exercise and support. Empowered by education and their own success, patients can lose up to 85lbs\* of excess weight in a six month period, provided the balloon program is followed correctly.

Gastroenterology Specialists of Frederick, is proud to offer one of the first balloon programs in the country. Let this program be your victory.

we offer our patients virtual after care enabling them to access nutrition behavior modification and fitness tips from anywhere at anytime.

According to the CDC, 69% of American adults are currently overweight. If you want better health, more energy, and higher self-esteem, you are not alone.

***Have you been dieting unsuccessfully for years?***
